Thanks for that impetus, Joan. The things we need right now, and where your voice can help press forward, are

- A decision on which program will fund
- A decision on which authority to use

You know that, having worked in both CERCLA and water, I've voiced a strong preference for relying on the removal program. And David has assigned Steve Merritt, an OSC in his program, to lead the implementation. But if there's a push to run the implementation out of the water program I think we jeopardize the schedule. OW is discussing contractor resources and perhaps using STAG \$ because that can be quickly given to states, a path only adds more complication.

No comments from me.

Looks like we'll need to have the monitoring plan reviewed, completed, and implemented through a QAPP and SAP, with funding in place and contractors mobilized over the next four weeks to begin LT sampling in mid-October.

Are we confident that's doable?

Folks, these documents address next steps on reducing sampling frequency, the PIO function, call center, etc. They are all quite short and include comments from HQ EOC desks. Thank all.
